AI GOVERNANCE AND ASSURANCE LEAD

Agent Action Governance | Responsible AI Product Strategy | Evidence and Decision Records

AI governance practitioner and founder with fifteen years in product strategy and design, the last two building Aletheai, a behavioural decision-intelligence company. Specialises in the control side of AI: what a system may infer and do about people, the evidence each action must rest on, and the record that lets someone outside the company check it. Drafted and filed six patent applications, including action gating for AI agents, and designed a feasibility study with the STFC Hartree Centre on real human-behaviour data. Seeking fellowship, residency and founding roles in AI governance and assurance; UK citizen, available from 1 December 2026.

- Drafted and self-filed six patent applications in 2025–26, including an international (PCT) application on evidence-ranked decision intelligence and a UK application on action gating for AI agents.
- Specified and built a decision engine that ranks only where the evidence supports it and records every refusal, shipping 12+ releases in 12 months by directing AI coding agents, with no engineering team.
- Led design and product strategy for a 250,000-member behaviour-change service, managing 12 designers and cutting external training spend by 45% and designer onboarding time by 70%.

CORE COMPETENCIES

AI Governance | AI Assurance | Agent Action Gating | Responsible AI | Decision Records and Audit Trails | Model Evaluation (calibration, lift, drift) | Data Protection and DPIA Evidence | EU AI Act and UK AI Principles | Product Strategy | Discovery and User Research | Behaviour Change | Specification-First AI Builds | Stakeholder and Partner Management | Teaching and Enablement

PROFESSIONAL EXPERIENCE

Aletheai (Monomindai Ltd) · London — Dec 2024 – Present

Founder & CEO · product strategy, architecture, IP and governance

- Defined the product strategy from discovery interviews with UK and US estate agents, then specified the engine and directed AI coding agents under review gates to deliver 12+ releases in 12 months.
- Designed the core governance principle: every ranked item carries a plain-English reason and next action, and the engine declines to rank, and records why, when the evidence is insufficient.
- Drafted and filed six patent applications and wrote the disclosure rules that govern what the company publishes about them.
- Designed the data strategy for an STFC Hartree Centre feasibility study, including a method for establishing why data is missing before a model is trusted on it.
- Secured RTC North support and a Start Up Loan, reached three AI Forge pitch finals, and set up a launch route through the Alto (Zoopla Group) marketplace, with the first cohort recruiting.

Slimming World · Derbyshire, UK — 2019 – 2024

Principal UX Strategist · Design Department Manager

- Managed 12 UX, UI and service designers on one of the UK's largest behaviour-change services, with 250,000+ active members.
- Led the digital North Star strategy across product, marketing and leadership, and briefed the C-suite on competitor and trend research.
- Authored and ran the UX Strategy & Discovery training programme, cutting external training spend by 45% and new-designer onboarding time by 70%.
- Built and presented an early behavioural-intelligence proof of concept for the member journey.

DiSH Creative Ltd · London (clients UK and US) — Apr 2024 – Present

Founder · AI strategy and applied-AI delivery on contract

- **Language Kids World, Houston:** Mapped a 60-person language-education operation and sequenced AI automations so each relieved the next, taking curriculum development from weeks to hours; found and closed a security gap unprompted.
- Ran board workshops on AI use-case prioritisation and designed automation frameworks that combine rules, model assistance and human oversight.

IED Madrid · London College of Communication (UAL) · Madrid · London — 2025 – Present

Lecturer, AI-native product building · Mentor and judge

- Teach MA students who are not engineers to ship working products with LLMs and AI coding agents within one course; deliver the same programme as in-house company training.

- Mentor student and graduate founders at LCC; judged LCC Accelerate 2026 (UAL with the NatWest Accelerator).

Earlier career: Senior Lecturer in Product Design, Nottingham Trent University (2017–19) · Co-founder & Chief Product Officer, Shake Your Power CIC (2014–17): SPARK, the first energy-generating musical instrument, with a granted US patent, two London Design Award Golds and STEM pilots in the UK, US and India · Founder, Monogram Publishers (2014–).

PATENTS, RESEARCH AND PUBLICATIONS

- **Patent application: behavioural decision intelligence:** International (PCT), priority September 2025. A decision engine that ranks who or what deserves attention by the evidence, attaches a plain-English reason and next action to every item, and refuses to rank where the evidence is insufficient, with the refusal recorded.
- **Patent application: action gating for AI agents:** UK, September 2026. Every act an AI agent takes passes through a gate the agent cannot reach, is registered before it happens and must be justified by evidence the agent did not write; oversight does not depend on reading the agent's reasoning. Four further applications filed in 2026 are unpublished.
- **Design Poiesis (2026):** Own design methodology for the age of AI: five moves, two rails and a gate, in which every insight carries its trail. dianasimpsonhernandez.com/design-poiesis
- **Writing:** The Astra Moment and The Black Box Problem (Substack, 2026), on oversight when AI reasoning becomes harder to read; MA dissertation, Modern Mythopoeia (Royal College of Art, 2012).

EDUCATION AND TRAINING

Degrees: MA Design Products, Royal College of Art · BA Product Design, Central Saint Martins, University of the Arts London

Training: MIT xPRO, Designing and Building AI Products and Services (2024) · IDEO U, Service Design (2022) · ILM Level 3, Leadership and Management (2022) · Certified Scrum Master (2020) · Oxford Saïd Business School, FinTech (2019)

SKILLS, AFFILIATIONS AND LANGUAGES

Tools: Claude, OpenAI and Mistral APIs · AI coding agents · Python · Streamlit · Git and GitHub · Figma

Affiliations: Fellow, Royal Society of Arts (FRSA) · Associate Fellow, Higher Education Academy (AFHEA) · Education Ambassador, CREATE

Invited talks: European Commission, Brussels · British Library · CAMEo Research Institute, University of Leicester · V&A · Royal College of Art

Languages: English and Spanish (fluent) · Italian (working)
