Diana Simpson-Hernandez

Chief AI Officer (contract) · AI product strategy · Behavioural decision intelligence & AI governance

London · remote | dianasimpsonhernandez@gmail.com | +44 (0)7973 933 859 | linkedin.com/in/dianasimpson | dianasimpsonhernandez.com

Open to: contract or fractional Chief AI Officer, Head of AI / AI strategy roles, and AI product-strategy engagements · 2–4 days a week or interim · from October 2026 · London, hybrid or remote

Right to work: UK, no sponsorship needed · delivery in English or Spanish · FRSA · AFHEA · Certified Scrum Master

PROFILE

Founder and chief architect of a patent-pending behavioural decision-intelligence company, and a product strategist with fifteen years turning emerging technology into decisions a business will act on and can defend. In two years I have taken Aletheai from a question — how do you make a machine decision someone will trust? — to a shipped engine, two patent applications, a feasibility study with the STFC Hartree Centre, and a route to market; and I have written the methods I used along the way so a client can check them before hiring me. The through-line is governance as product: a system that only acts where the evidence supports it, says so when it doesn't, and leaves a record a regulator could read. I now want to put that into other companies' AI programmes as a Chief AI Officer or strategy lead — deciding what to build, buy or leave alone, and making what ships defensible.

ORIGINAL WORK AND INTELLECTUAL PROPERTY

- **Patent application 1 · behavioural decision intelligence (Aletheai) —** International (PCT) application, priority September 2025; filed August 2026. A decision engine that reads behavioural signals from the systems a business already runs, ranks who or what deserves attention by the evidence rather than a score over everything, attaches a plain-English reason and next action to every item, and refuses to rank where the evidence is insufficient — with the refusal and its reason recorded. The ranking behaviour rests on a fixed, versioned library of behavioural archetypes that changes only at signed releases, never silently in production.
- **Patent application 2 · governing agent automations —** UK application filed September 2026. Action gating for AI agents: every act an agent takes passes through a gate the agent cannot reach, is registered before it happens, and must be justified by evidence the agent did not write; refusals are recorded; oversight does not depend on reading the agent's reasoning. The gate uses no model — deterministic, replayable, zero marginal inference cost. Governance of machine conduct, not machine thought.
- **Missingness and refusal (STFC Hartree Centre feasibility study, 2026) —** Designed the data strategy for proving the engine on real human-behaviour datasets, including a method for decomposing why data is missing before trusting a model on it; the 'honest refusal' principle grew out of this work. A further filing is in preparation (2027) on what a system should do after it refuses.
- **Published methods —** LEVER (decision diagnostics: goal ladder → decision blueprint → leverage equation, with a live calculator) · RECALL (making a company's documents answerable: question ledger → corpus condition index → answerability equation) · STAKE (product partnerships with a revenue ledger) · FLYWHEEL (eight-dimension venture diagnostic) · Vibecoding (non-engineers specifying and shipping with AI coding agents) — frameworks.dianasimpsonhernandez.com. Design Poiesis (working name): a method for designers working with AI — five moves between two rails, every insight carrying its trail from grounds to claim.

EXPERIENCE

Aletheai (Monomindai Ltd) · London — Dec 2024 – present

Founder & CEO · product, architecture, IP and commercial direction

Behavioural decision-intelligence company. Patent pending. First market: UK estate agencies — the product tells every negotiator which enquiries are worth their time today, why, and what to say, and says so when the evidence isn't there.

- Set the product strategy and wrote the value proposition from discovery with UK and US agents; specified the engine and directed the build with AI coding agents under review gates — 12+ releases in 12 months with no engineering team.
- Authored both patent applications (self-filed) and the disclosure regime around them; ran the STFC Hartree Centre feasibility study; secured an Innovate UK grant through RTC North; launching through the Alto (Zoopla Group) marketplace; three-time AI Forge pitch finalist.
- Owned pricing architecture, partnerships, funding applications, data-protection and security packs; designed and built a consumer research instrument (Wayfind) to study follow-through on declared goals, with privacy guarantees enforced in the schema.

DiSH Creative Ltd · London (clients UK and US) — Apr 2024 – present

Founder · AI strategy, product discovery and applied-AI delivery on contract

My own company for contract and consulting work, alongside Aletheai. Selected engagements:

- **Language Kids World, Houston (2026) —** Mapped a 60-person language-education operation, then designed and sequenced AI automations so each relieved the next: curriculum development from weeks to hours (92% less time; 10–15 working weeks a year returned to the founder); found and closed a security gap unprompted; structured a royalty-and-service partnership on the tools built.
- **Commercial and non-profit clients (2024) —** Applied-AI product strategy with up to 60% operational-efficiency gains and 25% uplift in engagement; automation frameworks combining rules, model assistance and human oversight (manual workflows down ~40%); board workshops for AI use-case prioritisation; impact-measurement strategies for NGOs.

IED Madrid · London College of Communication (UAL) · Madrid · London 2025 – present

Lecturer, AI training & innovation · mentor, venture coach and judge

– Vibecoding workshops for MA students (non-engineers shipping working products with LLMs and coding agents in a term), the same format run as in-house company training; business and venture evaluation lectures and one-to-one mentoring at LCC; judge, LCC Accelerate 2026 (UAL · NatWest Accelerator).

Slimming World · Derbyshire, UK 2019 – 2024

Principal UX Strategist · Design Department Manager

– One of the UK's largest health and behaviour-change platforms (250,000+ members). Managed a team of 12 designers; company-wide design system; authored the UX Strategy & Discovery training programme (external training spend down 45%); led the digital North Star strategy; built and showed an early behavioural-intelligence proof of concept for the member journey.

Earlier — Senior Lecturer in Product Design, Nottingham Trent University (2017–19). Co-founder & Chief Product Officer, Shake Your Power CIC (2014–17): SPARK, the first energy-generating musical instrument — US patent granted, two London Design Award Golds, STEM pilots in the UK, US and India. Founder, Monogram Publishers (2014–): author of The Art of Getting Stuff Done (2022); host of the Stand Out podcast.

WHAT I DO AS A CHIEF AI OFFICER

Strategy: which decisions and workflows AI should improve and which to leave alone · build / buy / leave · decision-level ROI · pilot design · vendor and model selection · roadmap and operating model

Governance: what a system may infer, say and do about people · evidence-ranked priority, honest refusal and the decision record · DPIA-ready evidence trails · model evaluation (calibration, lift, drift) · EU AI Act and UK-principles readiness · agent action gating

Delivery & enablement: specification-first builds with AI coding agents under review gates · corpus and data readiness (RECALL) · in-house training for product, design and leadership teams · board and ExCo workshops

Tools: Claude, OpenAI and Mistral APIs · LLM and RAG product design · AI coding agents (Claude Code) · Python · Streamlit · synthetic data · Git/GitHub · Railway and Streamlit Cloud · Figma (expert)

EDUCATION & AFFILIATIONS

Education: MA Design Products, Royal College of Art · BA Product Design, Central Saint Martins (UAL) · MIT xPRO, Designing & Building AI Products and Services (2024) · IDEO U, Service Design · Oxford Saïd, FinTech · ILM Level 3 Leadership

Affiliations: FRSA · AFHEA · Education Ambassador, CREATE · invited talks at the European Commission, British Library, V&A, RCA, CSM · English and Spanish (fluent), Italian (working)
